Technical Skills

Strong - Javascript, JQuery , React.js, React Native, Redux, Firebase, Html5, Css3, Sass, Bootstrap

Experienced - Node.js, Express, Mysql, Material UI

Tools - Git, Github, Meistertask, Sublime, Postman, Mamp

Applications Developed

Dance Mentors [live](#) | [github](#)

- Dance Mentors is a social platform that serves to grow the dance community scene in Orange County.
- The technologies I used were Node.js, React.js, Redux and Javascript. What I worked on were the card and contact modals. Within the contact modal I set up Nodemailer for email functionality.

What Should I Watch? [live](#) | [github](#)

- Group hackathon web application that displays useful API data of a randomly generated movie.
- I did the research on which three API's we could use all in conjunction for our page to flow . I utilized HTML5 and JQuery for the base layout of the page. We applied the aesthetics of our web page with CSS3.

Student Grade Table [live](#) | [github](#)

- Student Grade Table's app is for creating, reading, updating and deleting student information data.
- Student Grade Table consisted of both Javascript and Firebase. Firebase database was used to complete 'CRUD' operations. To complete the layout and design of the app I used Bootstrap and CSS3.

Professional Experience

Chipotle

- Assistant General Manager 2012 - 2017
 - One of my responsibilities were maintaining my store's Business Culture.
 - Managed hiring, firing, labor intake and auditing in my store.
 - Lastly I developed employees into management roles within the store.

Mary & Friends

- Special Education Integrator 2011 - 2012
 - Responsible for integrating special needs adults into community life.
 - Teaching them body language, speech, and manners around other adults and children.

Education

- Learning-Fuze, Accelerated Program 2017-2017
- Saddleback College 2016-2017
 - Relevant courses: Html5, CSS3
