### Technical Skills

Strong - Javascript, JQuery , React.js, React Native, Redux, Firebase, Html5, Css3, Sass, Bootstrap

Experienced - Node.js, Express, Mysql, Amazon Web Services, Material UI

Tools - Git, Github, Meistertask, Sublime, Postman, Mamp

### Applications Developed

Dance Mentors [live](#) | [github](#)

- Created this application with a team of 4 developers as a social platform that serves the dance community scene in Orange County. This app we used React.js, Redux, Node.js, Firebase, and Material UI.
- Served as the front-end developer on this team to compose the overall design and feel of the application.
- The dynamic filter search utilizes Google's Map API and reverse geocoding.

What Should I Watch? [live](#) | [github](#)

- Group hackathon web application that displays useful API data of a randomly generated movie.
- The team did extensive research on which three API's we could use all in conjunction for our page to flow . HTML5 and JQuery were utilized for the base layout of the page. Aesthetics of our app was applied with CSS3.

Student Grade Table [live](#) | [github](#)

- Student Grade Table's app is for creating, reading, updating and deleting student information data.
- This web application consisted of both Javascript and Firebase. Firebase database was used to complete 'CRUD' operations. To complete the layout and design of the app I used Bootstrap and CSS3.

### Professional Experience
